

## Project Date & Location

July 2023

Private Home, Stamford

## Specification

- ◆ 120 linear metres of aluminium coping with bespoke angles in Black RAL9017m & White RAL 9016m
- ◆ Seven different wall thicknesses in two different colours to match existing wall render and brick
- ◆ Wall thickness ranging from 145mm up to 405mm

## Solution

Alumasc Skyline aluminium coping supplied in 3m and 2m lengths with bespoke corners and angles joining different wall sizes together.

## Description

Home owner had experienced leaks from the original metal flashings used on the parapet walls and decided to replace them all with the Skyline coping system.

The attractive clean lines of Skyline aluminium coping have an aesthetically pleasing, contemporary quality that will enhance any roofscape, plus a life expectancy of more than 25 years.

## Contractor

Front Row Construction

Gutter Centre worked out the schedule and provided drawings for the customer to approve prior to manufacture.
