

## Project Date & Location

 October 2021

 Bishop Stortford

## Specification

- ◆ Replace existing plastic guttering, plus soil & waste pipework, to 15th century listed property
- ◆ Products need to be in keeping with this traditional styled property
- ◆ Support on estimating and installation guides required

## Solution

The Marley Alutec aluminium traditional style bolted gutter system with cast collared downpipes, in Textured Heritage black, with Hargreaves cast iron Traditional Express soil & waste system.

## Description

Home owner needed advice on the best rainwater system to suit a listed traditional styled property and help with list of materials for their tradesman to install.

To help finish the project and complement the traditional glass roof veranda and slate terrace, they decided to replace the plastic soil stack with a new cast iron soil and waste system.
