

Product: NOG45, 4½” Notts Ogee, Cast Iron Gutter

Product range: Alumasc Cast Iron Rainwater Systems

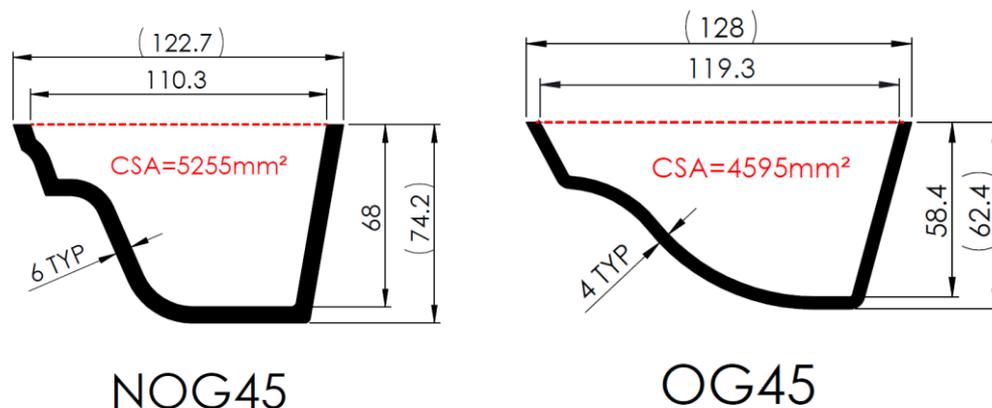

Features and benefits:

- System provides unrivalled strength, and durability due to its heavier wall section when compared to standard OG and MG of similar sizes.
- A complete range of accessories such as angles, outlets, stop ends and various brackets are available.
- Will work with current Apex P25, P30 cast iron down pipes and fittings.
- Traditional sand cast iron (see specification for grade)
- Manufactured to BS 460:1964
- Supplied transit primed or factory applied wet paint finish
- Gutters are traditionally wet sealed with NBW socketed joints (external unions)
- For installation and maintenance guidance of the new system, use existing AWMS Cast Iron guides.

Specification:

- Manufactured from grey cast iron, material grade HT150 (GB), EN-GJL-150 (EN), GG15 (DIN)
- Gutters supplied in 1875mm overall lengths with an effective length of 1830mm (6ft)
- Cast gutter elements are marked '4 ½ NOG' on under side, close to socketed end. Fittings having additional info such as angle '90°' or '135°' and orientation 'EXT' or 'INT' when appropriate.
- Component drawings available on request.
- The NOG45 will not initially be supported by AWMS rainwater calculator software, contact technical@alumascwms.co.uk for latest info on this subject.

Cross Sections of NOG45 and standard OG45
