

RP-FR Adjustable Paving Support Pedestal

Overview

Fully non-combustible adjustable paving pedestal manufactured from steel, with zinc-nickel electroplating for corrosion resistance. Millimetre perfect adjustability between 25 and 505mm.

- Suitable for all calibrated paving types, including porcelain, concrete, and natural stone
- Locking ring ensures absolute stability
- Large height range available
- Perfect for terraces, podiums, roof decks and inset balconies
- Holes in base for fixing to substrate if required.

Performance

Product material	Zinc-nickel electroplated mild steel
Reaction to fire	A1
Compressive strength	4400kg+
Base dimensions	120x120mm (170mm round spreader plate available)
Head diameter	90mm
Spacer tabs	2mm, 3mm & 5mm
Biological/chemical	Resistant to moulds, algae, alkali, bitumen, UV
Warranty	30 years
Design life	60 years

Sizes

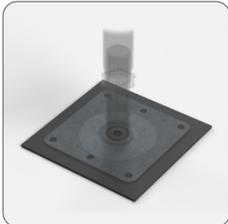

Code	Adjustable height range
RP-FR-1	25-35mm
RP-FR-2	35-50mm
RP-FR-3	50-70mm
RP-FR-4	70-115mm
RP-FR-5	115-205mm
RP-FR-6	205-305mm
RP-FR-7	305-405mm
RP-FR-8	405-505mm

Accessories

Head shock pad

Head shock-absorbent gaskets fit on top of the paving supports, cushioning tiles and removing the possibility for grit to cause grinding between tile and pedestal head.

Base shock pad

Base shock-absorbent membrane pads can be installed under the pedestal/support base to enhance acoustic properties, or to provide additional protection to the waterproof system.

Edge spring clip

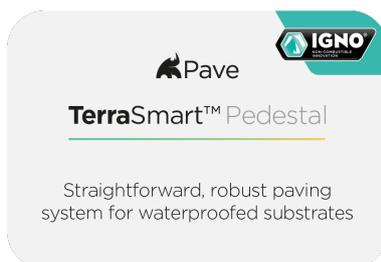

The edge spring clip fits on top of paving supports around the periphery of paved areas to ensure uniform spacing against wall abutments, helping ensure rapid drainage. By tensioning the tile bed, it counteracts creepage and movement.

Spreader Plate

For applications where the substrate requires lower point pressure, the 170mm circular spreader plate can be attached to the underside of the pedestal base

Compatible Systems

TerraSmart™ Pedestal

Straightforward, robust paving system for waterproofed substrates
