

Lindab Rainline™ – The roof drainage system produced in prime quality steel

When it comes to creating beautiful, environmentally friendly and maintenance free buildings, using the right materials is everything. The Lindab Rainline™ Steel Rainwater system uses the very best in lightweight galvanised steel to create a contemporary, cost effective and eco-friendly guttering system that won't shrink, split or leak – and looks great too.

Tile Red RAL 8004

Dark Red RAL 3009

Anthracite Metallic RAL 9007

Pine Green RAL 6020

Brown RAL 8017

Order cancellation is not permitted on special colours or rectangular system.

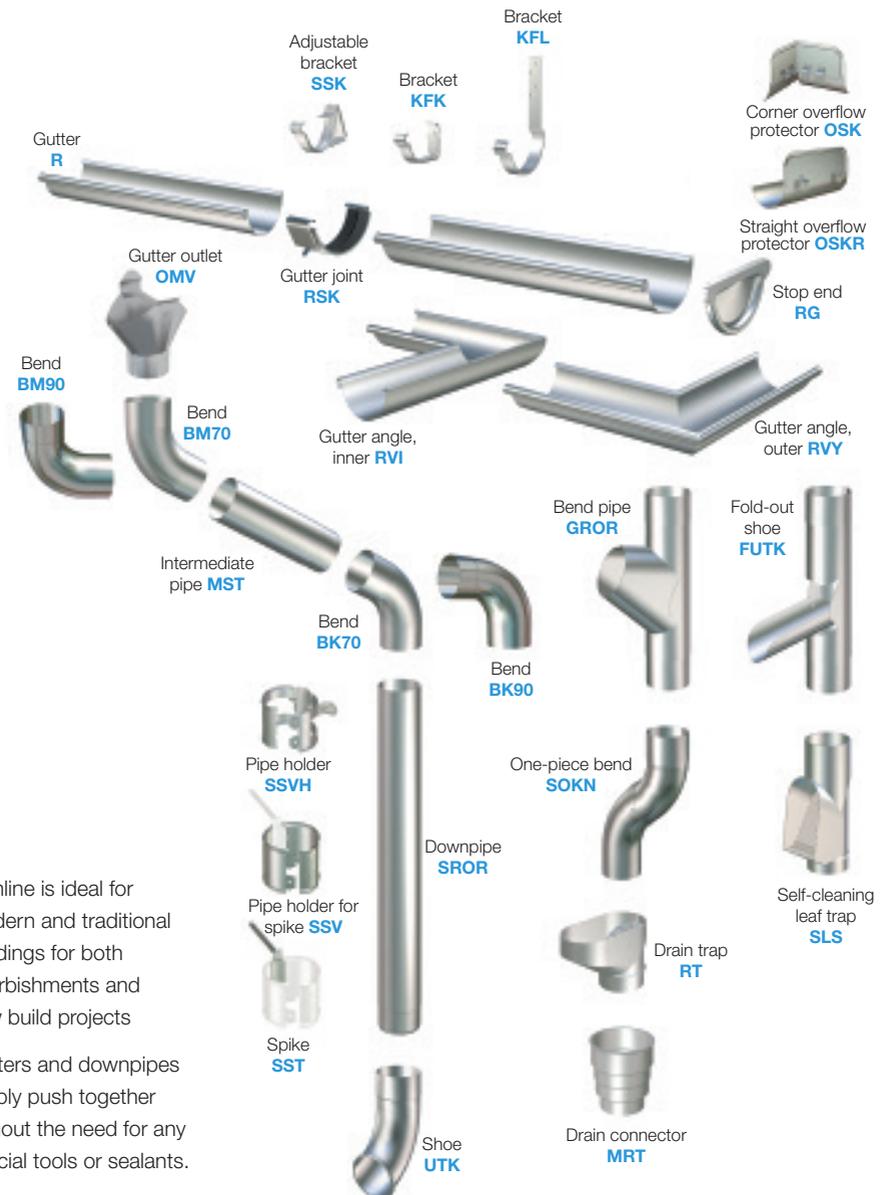

Beauty that lasts

Each piece of core steel is coated with 275g zinc per square metre, a naturally self-healing coating that won't discolour or rust. The coating on both our High Build Polyester and Aluzinc guttering systems, are guaranteed for 15 years with a life expectancy in excess of 70 years.

Plain galvanised material comes with a 12 months guarantee and is not advised for projects in coastal regions where salt water can have a corrosive reaction. In these instances a coated system should be used.

Please note that copper metallic gutters and accessories are not available in 100mm dimensions. Pine Green and Anthracite Metallic are only available in selected sizes.

Lindab Rainline Steel Rainwater System components

Rainline is ideal for modern and traditional buildings for both refurbishments and new build projects

Gutters and downpipes simply push together without the need for any special tools or sealants.
